member of the Pont Europe Group

DISCOVER THE MOST POPULAR PACKAGING SOLUTIONS FOR THE VITAMIN & SPORTS NUTRITION MARKET

Making sure your brand is securely, sustainably and attractively packaged is what drives us at Pont.

We can talk you through every aspect of your packaging journey, from choosing the best material for your requirements to understanding how a customized packaging can add value and boost shelf appeal.

Pont offers a diverse range of packaging options to create a solution that protects and promotes your products. From the lightweight up-to 100% rPET to the luxurious amber glass, our sustainable materials are available in an extensive family of sizes for strong brand identity.

Our simple, practical and beautiful designs will complement your products, with liquids, powders, supplements, creams and oils for food, personal care, animal care and wellbeing all finding their perfect packaging at Pont.

To make your brand even easier to love, we offer a comprehensive range of closures, caps and scoops, with tamper evident bands and child safe features available as well as bespoke design elements including embossing, engraving and decorating. Pont packaging is easy to fill too, with wide neck options across our range.

As your local packaging partner with the support of our network of European locations, Pont will deliver your packaging solutions where you want, when you want. Our people are available to support you in creating effective, attractive and responsible packaging that your customers can enjoy.

ABBREVIATIONS EXPLAINED:

ALU	Aluminium	CRC	Child resistant closure
HDPE	High-density polyethylene	CT	Continuous thread
LDPE	Low-density polyethylene	HG	Hingegard
MET	Metal	TE	Tamper Evident
PET	Polyethylene terephthalate	ROPP	Roll-on Pilfer Proof
PP	Polypropylene	IHS	Induction Heat Seal
		PS	Pressure Sensitive
		PVDC	Polyvinylidene dichloride

A TRULY SUSTAINABLE APPROACH

Four Rs that support the Circular Economy

REDUCE MATERIALS WHERE POSSIBLE

Reducing material wherever possible is integral to supporting a circular economy. Creating a lightweight version of a product using clever design uses less raw material, with only minimal changes to filling lines. Lightweighting is a positive marketing tool as well as a positive environmental action, as you can tell your customers how many kilos of plastic you have saved over a certain period of time.

DESIGN FOR RECYCLING

Recycling goes beyond the actions of the end user. Design for Recycling (DfR) integrates recycling right from the design process and considers the combination of the whole package, making your product as easy to recycle as possible. DfR looks at the container, the closure, the choice of label, the type of glue...these decisions can make all the difference between a recyclable item and a non-recyclable item.

USE RECYCLED MATERIALS

Recycled PET (rPET) and recycled HDPE can be recycled many times with no degradation of their quality, with rPET ideal for food grade applications. Glass can be recycled endlessly with no change in performance! Even though recycled HDPE (popularly used in closures as virgin material) is not currently available as food grade, it has many other applications.

CHOOSE RENEWABLE MATERIALS

Bio-based HDPE materials offer the same performance as petrol-based HDPE, but with a great reduction of your global carbon footprint, plus it's certified for food contact applications. Using renewable raw materials is a sustainable step forward for your packaging.
