SUSTAINABLE PACKAGING SOLUTIONS

WHO WE ARE

Dedicated to assisting companies of all sizes in finding the perfect packaging solutions for their requirements, our commitment has helped us become a key player in the packaging industry today. This achievement is the result of over 100 years of trustworthy partnerships with our customers.

DIVERSE RANGE

With a wide scope of items readily available from our stock inventory, we provide reliability and variety to suit your requirements.

Need something more specific? With over a century of experience in packaging development we can support with designing, prototyping and manufacturing your own bespoke packaging to meet your exact requirements.

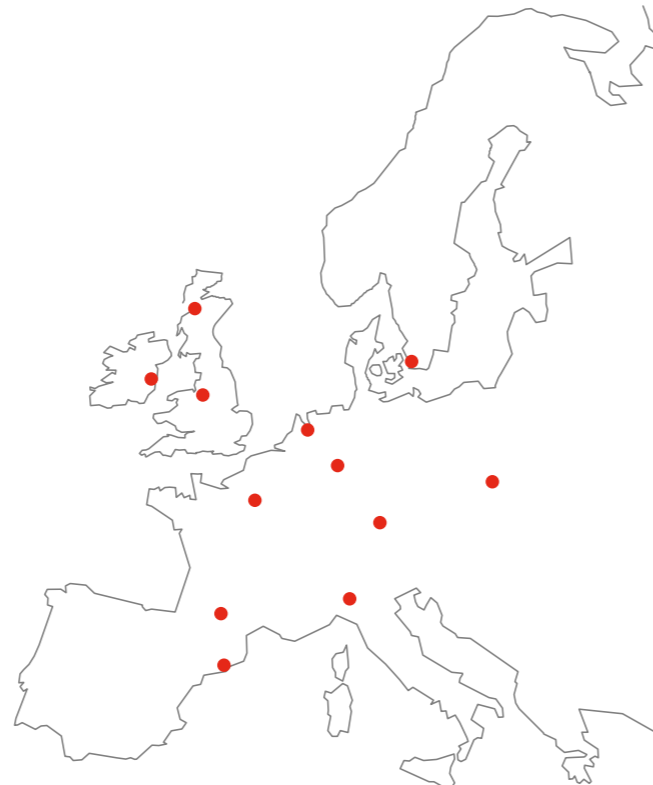

SUSTAINABILITY

At Pont, the primary focus is on sustainability, with collaborations alongside certified testing laboratories to rigorously test and ensure eco friendliness of our products. This commitment has resulted in a broad range of sustainable packaging solutions to help support you on your journey to becoming more sustainable.

To find out more about sustainable options from Pont Packaging, visit www.mygreenpackaging.com

OUR LOCATIONS

Wherever you are, our strategically placed European facilities provide dedicated and responsive support. It's not just words; it's our personal commitment to you.

GLASS, THE ORIGINAL PACKAGING

Glass packaging is part of our DNA. Let us explain how beautiful glass jars, bottles, and containers can add lasting value to your brand. Whether you're creating a craft beer with beer-like appeal or a delicious chutney destined for high-end local food stores, Pont is here to explain how to use our glass packaging responsibly.

- Amber glass **protects** your products from UV light
- White glass provides **perfect transparency**
- Wide necks ensure easy **filling**
- Consumers expect to **recycle – or reuse** – glass
- Glass is welcome at **standard recycling** centers
- Glass is **inert**, making it ideal for chemicals and drugs
- It's the best way to access **high-end luxury**
- By choosing glass, consumers are opting for **sustainability**
- Perfect for **handcrafted products**
- **Less energy** is required to produce recycled glass (cullet)

The choice of glass speaks for itself: it's a shortcut to natural luxury, to premium products and to what's good.

Talk to Pont about choosing the right glass and we'll help you find the right bottle or jar.

ABBREVIATIONS EXPLAINED:

CT	Continuous Thread (screw neck)	GPI	Glass Packaging Institute (standard)
DIN	Glass Ring Type (Deutsche Industrie Norm) = GL	MTO	Medium Screw Ring/Closure Type
DTO	Deep twist off neck finish/closure	ROPP	Roll-on Pilfer Proof (= PP, PFP)
HG	Hingegard (snap-on neck with tear-off ring)	R3, R6	General Purpose, Single Locking Thread
GCA	Snap-on cap with Tamper Evident Ring for glass	TE	Tamper Evident
GL	Glass Ring (DIN in German)	TO	Screw-on ring/closure

FOUR WAYS TO MAKE YOUR BRAND MORE SUSTAINABLE

REDUCE MATERIALS WHERE POSSIBLE

Lightweighting makes it possible to have a positive impact on the environment by reducing the overall amount of materials used. We strive to develop and produce packaging that is as light as possible, without compromising its functionality. While this is not possible for every item, it is an ongoing process at Pont, as we revise our ranges with a focus on reducing material weight.

DESIGN PRODUCTS SUITABLE FOR RECYCLING

Design for Recycling (DfR) provides an understanding of how recyclable the entire packaging is – the container, the closure, the label, the glue... all of it. Incorporating design for recycling as early as possible in the process of creating and producing your packaging can make all the difference between your packaging being welcomed – or not – in standard recycling collections.

USE RECYCLED MATERIALS

Glass, as well as recycled PET and PE, are materials that have the same performance as their virgin versions, but consume much less energy and resources. They can be recycled several times without loss of quality. The glass can even be recycled indefinitely and remains food-grade.

USE OF RENEWABLE MATERIALS

Reduce your carbon footprint by choosing natural raw materials for your packaging. Glass is produced from sand, a widely available natural source. Using natural raw materials for your packaging is a big step towards sustainability and reducing your overall carbon footprint.

HOW TO IMPROVE THE SUSTAINABILITY OF YOUR GLASS PACKAGING

Environmental challenges affect us all very seriously. If the use of packaging is necessary, it is possible to minimize the impact by intelligently optimizing your packaging and production processes.

In a circular economy, packaging is exchanged in a closed loop. It's important to retain the value of your products and materials after they're disposed of. That's why it's not just about the materials used, it's also about making sure that the products are suitable for recycling and can be reused. This allows the materials to live a long life and retain their value.

GLASS IS AN IDEAL MATERIAL FOR A CIRCULAR ECONOMY.

It is important to recycle glass, which is 100% recyclable and can be remelted over and over again without loss of quality. Recycling your glass packaging reduces the use of non-renewable fossil fuels as well as CO2 emissions from carbonate raw materials such as limestone.

FOR GLASS PACKAGING

- **MATERIAL:** Choose items produced with recycled glass.
- **COLOUR:** Minimize the use of translucent glass, white, green or brown, for which recycling channels are already available. Avoid metallization.
- **LINERS:** Avoid / minimize additional components such as liners.
- **LABEL:** Use paper labels or direct printing. Reduce the size of the label. Avoid full body sleeves or shrink wrap. Include information on the proper recycling of each component of the package.
- **SIZE:** Avoid using a container that is too large to pack the product. Lightweight as much as possible.
- **CAP:** Ensure compatibility for recycling. Use steel, aluminum, PE or PP closures. Avoid composite materials. The caps should be easily detachable to allow for separate recycling.
- **ADHESIVES:** Avoid the use of hot melt adhesives. Avoid sticky decorations.
- **INKS:** Please use non-toxic inks. Direct printing allows the glass to break down into cullet.

HOW TO MAKE YOUR BRAND UNIQUE

4 SIMPLE STEPS TO CREATE GREAT CUSTOMER EXPERIENCE

Did you know that 90% of consumers decide to buy only after looking at the front of the package? Take advantage of this when choosing your brand's packaging! Consider one of the following four simple steps to help your product stand out.

1

PRINT YOUR MESSAGE

The easiest and most affordable way to create unique packaging for your product is to print your message directly on the closure.

This only applies to metal closures.

Let us know your specific request for printing on any type of metal closure and we will find a solution for your packaging.

2

USE YOUR BRAND'S COLOUR

Using a color that is related to your brand's identity will make it easily recognizable to consumers.

Your unique packaging will not only look good, it will automatically link to your brand. Imagine your product standing out on the shelves with vibrant, eye-catching colors that truly reflect your brand.

To do this, it is possible to spray a standard white or amber flint bottle or jar or use colored glass.

Please contact our sales team for specific terms.

European packaging supplier PONT offers a wide range of containers and bottles in plastic (virgin, recycled or bio-based) and glass as well as associated closures and accessories.

With a network of well-stocked warehouses and sales offices strategically located throughout Europe, PONT quickly delivers efficient packaging solutions worldwide.

PONT focuses on packaging innovations and is renowned for creative and attractive designs that meet our customers' requirements.
