**pont**  
PACKAGING  
GROUP  120  
YEARS  
ESTABLISHED 1906

Where every product finds its *perfect* look.

# Discover smart, sustainable packaging for *cosmetics* and *personal care*

From skincare to serums, creams to oils - beauty products deserve packaging that's as refined and purposeful as the formulas inside.

At Pont, we help brands across the cosmetics and personal care sector **find the right packaging solutions** that don't just look the part but perform brilliantly too.

Whether you're just starting out or scaling up, **we'll support you through every step** of your packaging journey - from choosing the right materials to tailoring the design and finish that best reflects your brand.

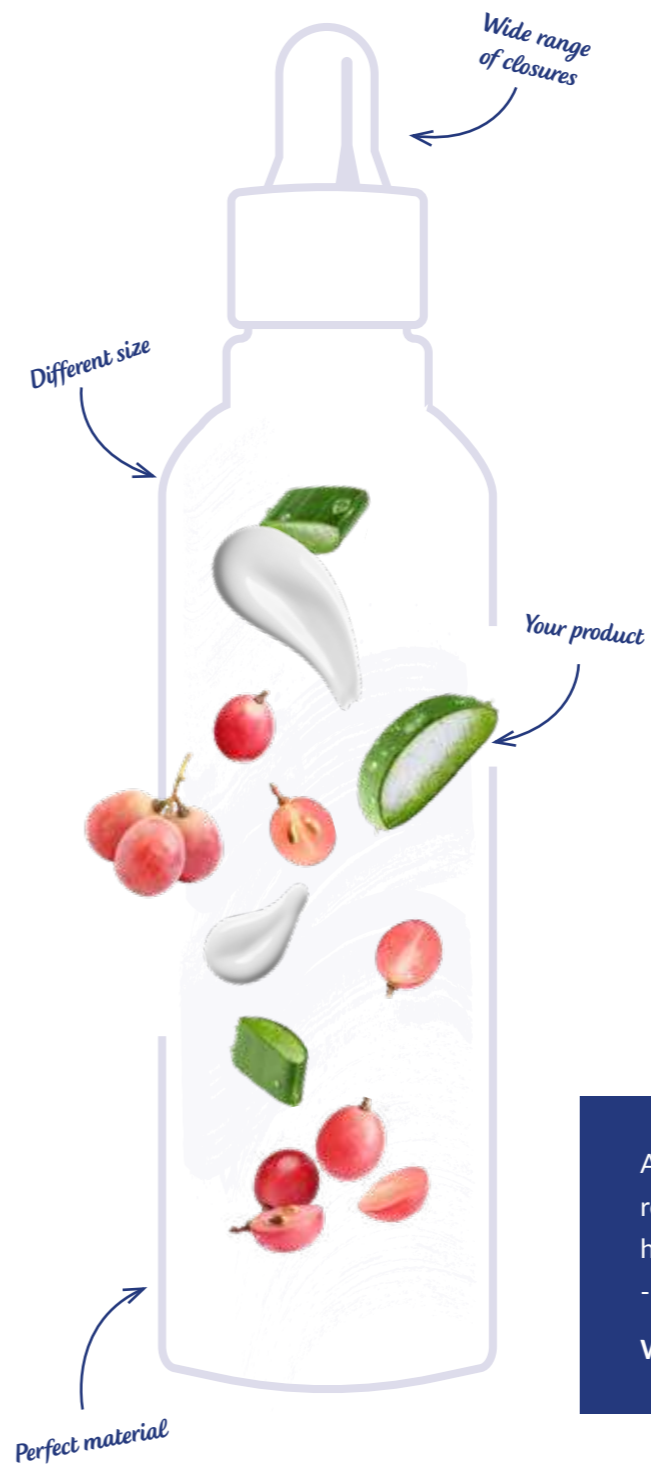

With a **wide range** of jars, bottles and closures made from glass, PET, HDPE and more, we offer **versatile, sustainable** options that protect your product, enhance shelf appeal and meet the latest environmental standards.

Many of our solutions are available in recycled or bio-based materials and can be customised in colour, print or shape.

Our packaging is designed to be **practical, beautiful** and **easy to use** - with wide necks, tamper-evident options and compatibility across our closure range

*Whether you're packaging a luxury face cream or a daily-use toner, we'll help you find a solution that fits.*

As part of a Europe-wide network, Pont offers fast, reliable service backed by technical expertise. We're here to deliver packaging that helps your brand grow - responsibly and with style.

**We don't just sell packaging. We find solutions.**

# How to make your brand *unique*

Four simple ways to stand out on the shelf

## Four simple ways to stand out on the shelf

**First impressions matter** - especially in the cosmetics and personal care world. Your packaging is often the very first touchpoint with your customer, so make it count.

With Pont, you can **customise** bottles, jars, and closures to **reflect your brand identity** and stand out on the shelf.

From colour matching and decorative finishes to embossing, labelling, and sustainable material options, we help you create packaging that not only looks premium but also tells your brand story.

### 1 Transform your brand with spray coating

**Premium glass packaging** already reflects the luxury and quality of your brand - but with **spray coating**, you can enhance it even further. Through our sister company Beatson Clark's in-house decorating plant, you can transform bottles and jars with **bespoke colours and finishes**.

From subtle frosted effects to bold, high-gloss shades, their wide range of coatings gives your packaging a distinctive edge and ensures your brand truly stands out.

### Innovative coating technology

Using the latest technology we have a number of spray processes available to ensure a quality finish, low waste and eye-catching effects to make a lasting impression on your customers.

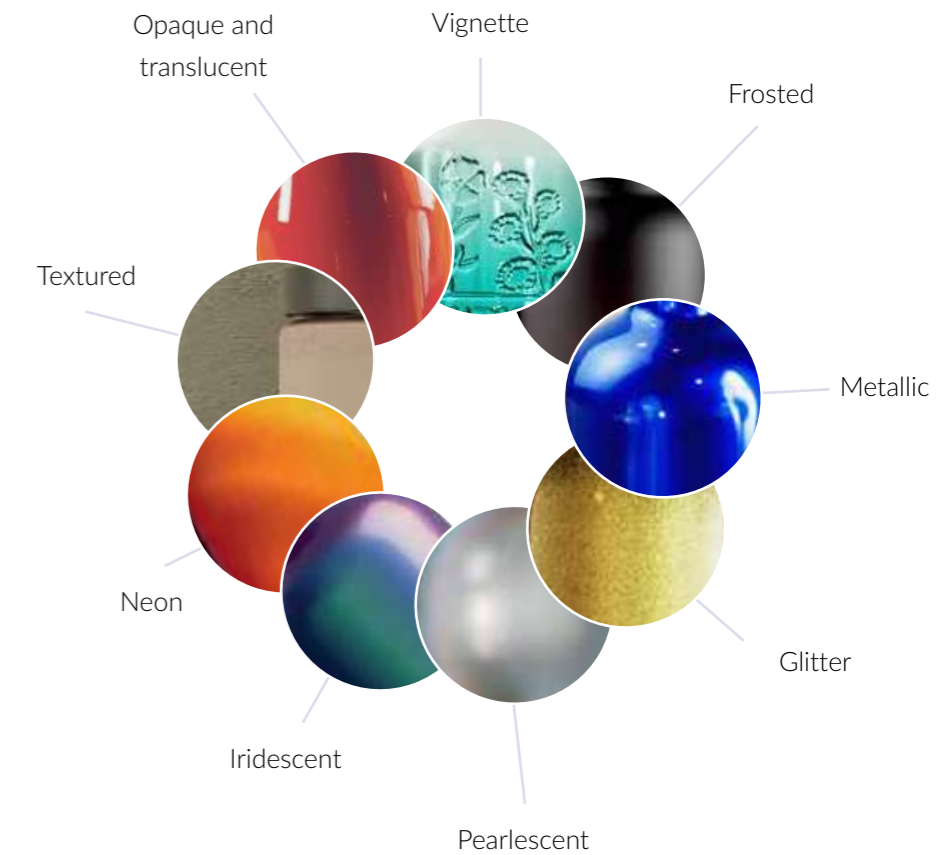

Premium organic paint quality

We use only the highest quality water-based paints to ensure a flawless and sustainable finish. With full colour-matching and Pantone reference options, we can create a shade that is truly unique to your brand and vision.

### Our paints are:

-  Water-based and eco-friendly
-  Organic and safe for use
-  Excellent in adhesion
-  Scratch resistant
-  Alcohol resistant

### A range of effects to suit your packaging

### 2 Print your message

Add a **unique detail with custom printed closures**. Whether it's a logo, strapline, or usage instructions, metal closures offer the perfect surface to get your message across in a premium way.

This service is **available on all metal/aluminium closures**. Just let us know what you have in mind and we'll help bring it to life.

### 3 Create a unique design

**Looking for something truly your own?** We offer full packaging development – from concept sketches and 3D models to bespoke tooling and final production.

**Custom shapes are ideal when you want:**

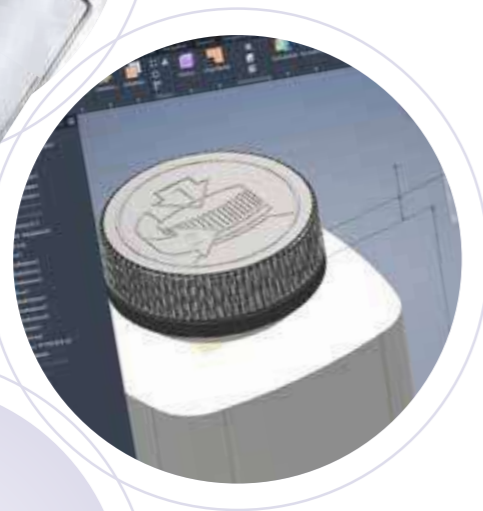

**Distinctive**  
on-shelf presence

Packaging to suit  
a **specific space**  
or **application**

A **bold look** that  
reflects your product's  
purpose

**Let's start your design journey together**  
our technical team is ready to guide you  
every step of the way.

## A TRULY SUSTAINABLE APPROACH

### FOUR RS THAT SUPPORT THE CIRCULAR ECONOMY

#### REDUCE MATERIALS WHERE POSSIBLE

Reducing material wherever possible is integral to supporting a circular economy. Creating a lightweight version of a product using clever design uses less raw material, with only minimal changes to filling lines. Lightweighting is a positive marketing tool as well as a positive environmental action, as you can tell your customers how many kilos of plastic you have saved over a certain period of time.

#### DESIGN PRODUCTS FIT FOR RECYCLING

Recycling goes beyond the actions of the end user. Design for Recycling (DfR) integrates recycling right from the design process and considers the combination of the whole package, making your product as easy to recycle as possible. DfR looks at the container, the closure, the choice of label, the type of glue...these decisions can make all the difference between a recyclable item and a non-recyclable item.

#### USE RECYCLED MATERIALS

Recycled PET (rPET) and recycled HDPE can be recycled many times with no degradation of their quality, with rPET ideal for food grade applications.

Glass can be recycled endlessly with no change in performance! Even though recycled HDPE (popularly used in closures as virgin material) is not currently available as food grade, it has many other applications.

#### USE OF RENEWABLE MATERIALS

Bio-based HDPE materials offer the same performance as petrol-based HDPE, but with a great reduction of your global carbon footprint, plus it's certified for food contact applications. Using renewable raw materials is a sustainable step forward for your packaging.

#### SUSTAINABILITY

At Pont, the primary focus is on sustainability, with collaborations alongside certified testing laboratories to rigorously test and ensure eco friendliness of our products. This commitment has resulted in a broad range of sustainable packaging solutions to help support you on your journey to becoming more sustainable.
