pont
PACKAGING
GROUP  120
ESTABLISHED 1906

Where every product finds its **perfect** look.

Discover smart, sustainable packaging for **food** and **beverage**

From sauces to spirits, oils to preserves - **food and beverage products** deserve packaging that's as considered and dependable as what's inside.

At Pont, we support brands across the food and beverage sector with **packaging solutions** that don't just look the part, but are designed to **protect quality, enhance shelf appeal and perform reliably** throughout the supply chain.

Whether you're just starting out or scaling up, **we'll support you through every step** of your packaging journey - from choosing the right materials to tailoring the design and finish that best reflects your brand.

With a **wide range** of jars, bottles and closures made from glass, PET, HDPE and more, we offer **versatile, sustainable** options that protect your product, enhance shelf appeal and meet the latest environmental standards.

Many of our solutions are available in recycled or bio-based materials and can be customised in colour, print or shape.

Our packaging is designed to be **practical, visually appealing** and **built for food and beverage** applications featuring wide neck options, compatibility with screw neck, deep twist-off and snap-on closures.

Whether you're packaging premium oils and sauces, artisan preserves or everyday food and drink products, we'll help you find a solution that fits your product, process and market.

As part of a Europe-wide network, Pont offers fast, reliable service backed by technical expertise. We're here to deliver packaging that helps your brand grow - responsibly and with style.

We don't just sell packaging. We find solutions.

SNAP-ON CAPS - LDPE	81
TWIST OFF AND DEEP TWIST OFF CAPS - METAL	83

HINGEGARD CAP

LDPE

TAMPER EVIDENT CAP WITH A TEAR-OFF RING

Diameter	Neck finish	Material	Liner
31,5 mm	Hingegard	LDPE	cone
38 mm	Hingegard	LDPE	cone, EPE, IHS, triseal
43 mm	Hingegard	LDPE	cone
45 mm	Hingegard	LDPE	cone, EPE, IHS, triseal
53 mm	Hingegard	LDPE	IHS
58 mm	Hingegard	LDPE	cone
60 mm	Hingegard	LDPE	cone
90 mm	Hingegard	LDPE	cone
95 mm	Hingegard	LDPE	cone

- MAXIMUM PROTECTION WITH THE TAMPER EVIDENT RING
- EASY TO OPEN WITH ONE HAND
- AVAILABLE IN THE COLOUR OF YOUR CHOICE, BASED ON MOQ
- 38 MM & 45 MM CAPS AVAILABLE WITH OWN LOGO FROM 25K PIECES

MEASURING CUP

PP

IDEAL ACCESSORY TO DOSE LIQUIDS, FITTING ON THE CLOSURE OF THE BOTTLE

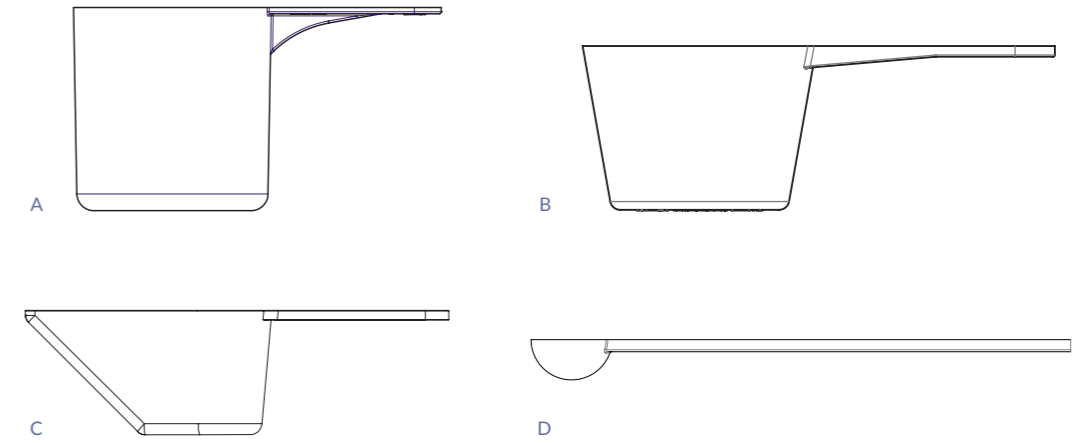

Capacity	Material	Colour
2-15 ml	PP	clear
5-20 ml	PP	clear
5-20 ml	PP	clear
15 ml	PP	clear
30 ml	PP	natural
30 ml	PP	natural

- GRADUATED FOR PRECISE DOSING
- CLEAR VISIBILITY ON THE LIQUID INSIDE
- AVAILABLE IN THE COLOUR OF YOUR CHOICE, BASED ON MOQ

MEASURING SCOOP

PP

IDEAL ACCESSORY FOR PERFECT DOSING OF POWDERS AND GRANULES

Capacity	Shape	Material	Colour
0,1 ml	D	PP	white
4 ml	B	PP	natural
5 ml	B	PP	natural
6,5 ml	B	PP	natural
10 ml	B	PP	natural
15 ml	B	PP	natural
20 ml	B	PP	blue
25 ml	B	PP	natural
30 ml	B	PP	natural
32 ml	B	PP	natural
50 ml	B	PP	natural
60 ml	B	PP	natural
70 ml	A	PP	natural, blue, gold
70 ml	B	PP	natural
90 ml	B	PP	natural
100 ml	C	PP	natural, blue
250 ml	B	PP	natural

- TINY 0.1ML RIGHT UP TO 250ML SIZES AVAILABLE
- COMPLEMENTARY FOR LARGER JARS
- AVAILABLE IN THE COLOUR OF YOUR CHOICE, BASED ON MOQ

POLYMER CLOSURES

HDPE, PP

CUSTOMISABLE STANDARD CLOSURES

Diameter	Neck finish	Material	Liner	Colour	Finish
24 mm	R3, CRC	PP	IHS/PE	white	
28 mm	CRC, TE	HDPE/PP	polespan	white	
28 mm	CRC, TE	PP		white	
28 mm	R3	PP		white	
28 mm	TE	HDPE	EPE	white, black	
28 mm	TE	PP	bung, EPE	white	
31 mm	R6	HDPE	cone	natural	
33 mm	CT	PP	IHS/UNI2, PS22	white, black	ribbed
38 mm	CT	PP	IHS, PS22	white, black	ribbed, smooth
45 mm	CT	PP	IHS, PS22	white, black	ribbed, smooth
48 mm	CT	PP	IHS, PS22	white, black	ribbed, smooth
53 mm	CT	PP	IHS, PS22	white, black	ribbed, smooth
58 mm	CT	PP		black	ribbed

- CHILD RESISTANT AND TAMPER EVIDENT OPTIONS FOR SAFE AND SECURE CLOSING
- WITH A VARIETY OF LINERS FOR OPTIMAL PROTECTION
- STANDARD IN WHITE WITH OTHER COLOURS BASED ON MOQ

SCREW NECK CLOSURES

METAL

SPECIALIZED DESIGN, MAKING IT DIFFICULT FOR UNAUTHORIZED TAMPERING OF THE CONTENTS

Diameter	Neck finish	Material	Liner	Finish
20 mm	CT	METAL, ALU	IHS, EPE, woodpulp PVDC	ribbed
24 mm	CT	METAL	IHS, EPE, woodpulp PVDC, polycone	ribbed
38 mm	CT	METAL	IHS, PS22, EPE	ribbed, smooth
45 mm	CT	METAL	IHS, PS22, EPE	ribbed, smooth
48 mm	CT	METAL, ALU	IHS, PS22, EPE	ribbed
51 mm	CT	ALU	EPE	ribbed
53 mm	CT	METAL	IHS, PS22	ribbed, smooth
58 mm	CT	ALU	EPE	ribbed
70 mm	CT	METAL	PLASTIKSE	ribbed
83 mm	CT	ALU	EPE	ribbed
100 mm	CT	METAL	IHS, PS22	ribbed
120 mm	CT	METAL	IHS, PS22, EPE	ribbed

- EXCELLENT LEVEL OF TAMPER-EVIDENT SECURITY
- THE PRECISE FIT AND SEAL MINIMIZES OXYGEN EXPOSURE
- SPECIALISED CAPPING MACHINES CAN BE INTEGRATED INTO PRODUCTION LINES

SCREW NECK CLOSURE

89 mm	STER	metal	RSB	BPA-NI	gold
100 mm	STER	metal	RSB	BPA-NI	gold

- CLOSURES WITH INSERT FOR PRECISE DROPS
- CHOOSE BETWEEN HORIZONTAL OR VERTICAL DROPPER
- WITH TAMPER EVIDENT RING

How to make your brand **unique**

Four simple ways to stand out on the shelf

Four simple ways to stand out on the shelf

First impressions matter - especially in the cosmetics and personal care world. Your packaging is often the very first touchpoint with your customer, so make it count.

With Pont, you can **customise** bottles, jars, and closures to **reflect your brand identity** and stand out on the shelf.

From colour matching and decorative finishes to embossing, labelling, and sustainable material options, we help you create packaging that not only looks premium but also tells your brand story.

1 Transform your brand with spray coating

Premium glass packaging already reflects the luxury and quality of your brand - but with **spray coating**, you can enhance it even further. Through our sister company Beatson Clark's in-house decorating plant, you can transform bottles and jars with **bespoke colours and finishes**.

From subtle frosted effects to bold, high-gloss shades, their wide range of coatings gives your packaging a distinctive edge and ensures your brand truly stands out.

Innovative coating technology

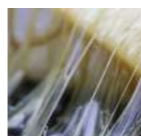

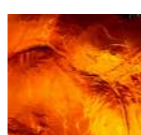

Using the latest technology we have a number of spray processes available to ensure a quality finish, low waste and eye-catching effects to make a lasting impression on your customers.

Premium organic paint quality

We use only the highest quality water-based paints to ensure a flawless and sustainable finish. With full colour-matching and Pantone reference options, we can create a shade that is truly unique to your brand and vision.

Our paints are:

	Water-based and eco-friendly
	Organic and safe for use
	Excellent in adhesion
	Scratch resistant
	Alcohol resistant

A range of effects to suit your packaging

2 Print your message

Add a **unique detail with custom printed closures**. Whether it's a logo, strapline, or usage instructions, metal closures offer the perfect surface to get your message across in a premium way.

This service is **available on all metal/aluminium closures**. Just let us know what you have in mind and we'll help bring it to life.

3 Create a unique design

Let the competition far behind you and create a design which will stand out from the shelf. You could also choose for an unique design when it is needed to fulfill specific requirements, for example that the packaging needs to fit in a distinct place or is for a particular use, e.g. diet products in a slim packaging. With your own packaging you can **truly reinforce your image and position in the market.**

Based on a study of your needs, our technical development team can take you through every stage of your packaging's progress. It all starts with a sketch, then it can be followed by a 3D model. When the test run is successful, the production tool will be created and the final production can start.

Let's start your packaging design journey together.

FOUR WAYS TO MAKE YOUR BRAND MORE SUSTAINABLE

REDUCE MATERIALS WHERE POSSIBLE

Lightweighting helps to have a positive environmental impact by reducing the overall quantity of material used. We aim to develop and produce our packaging as lightweight as possible, without compromising its functionality. While this is not possible for every item, this is an ongoing process at Pont, as we review our ranges with a focus on reducing the weight of materials.

DESIGN PRODUCTS FIT FOR RECYCLING

Design for Recycling (DfR) promotes the understanding of how recyclable your whole packaging is – the container, the closure, the label, the glue...all of it. Integrating DfR as early as possible in the process of creating and producing your packaging can make all the difference between your products being welcome – or not – in standard recycling collections. Consider transparent or light colours for PET and CBF colours for PE for the most sustainable solution.

USE RECYCLED MATERIALS

Recycled PET, recycled PE and glass are all materials that perform like their virgin versions but they use far less energy and fewer resources. They can be recycled many times without any reduction of quality. The use of light or clear colours for recycled PET products will make sure that the packaging can continue to be recycled and recycled again. Glass can even be recycled indefinitely! RPET and glass are food grade, and recycled PE is ideal for chemical and personal care applications as there is no food grade R-PE available.

By 2030, all plastic packaging must contain a certain percentage of recycled content and needs to be recyclable.

USE OF RENEWABLE MATERIALS

Reduce your carbon footprint by choosing renewable raw material made from renewable sources like sugarcane for your packaging. Biobased PE is food grade and has all the performance properties of oil-based versions, yet without the environmental negativity. Using natural raw material for your packaging is a great step towards sustainability and to reduce your global carbon footprint.

HOW TO IMPROVE THE SUSTAINABILITY OF YOUR PACKAGING?

It is important to consider what materials to use for your packaging including the label, label size, adhesive and closure to improve the sustainability of your packaging. By 2030, all packaging must be recyclable as stated in the Packaging and Packaging Waste Regulation. It is expected that the EU will set criteria and categories on the recyclability of packaging.

To make sure that products are fit for recycling and materials can be used again, we have the following recommendations:

FOR PET

- **MATERIAL:** Consider using recycled PET.
- **COLOUR:** Preferably use transparent or light blue as these colours are fully recyclable.
- **SIZE:** Avoid using a container larger than needed to pack the product.
- **LABEL:** Use labels in PE or PP.
- **LABEL SIZE:** As small as possible.
- **ADHESIVES:** The label should detach from the bottle and the adhesive layer should remain on the label without reactivation.

- **CAP:** Use a PP or a PE closure. Consider using a hingegard cap, so the cap stays attached to the jar.
- **LINER:** If liners are removed before disposal of the container they will not interrupt the recycling process of the container. Consider a hingegard cap with conus instead of a liner.
- **INKS:** Use non-toxic inks, avoid direct printing on the container.

FOR PE

- **MATERIAL:** Consider using biobased PE (food grade) or recycled PE (non food products).
- **COLOUR:** Preferably use light colours, or colours without carbon black.
- **SIZE:** Avoid using a container larger than needed to pack the product.
- **LABEL:** Use PE or PP labels without metallic.
- **LABEL SIZE:** As small as possible.
- **ADHESIVES:** Use water soluble adhesives.

- **CAP:** Use a PE, a bio-PE or a PP cap. Consider using a hingegard cap, so the cap stays attached to the jar.
- **LINER:** If removed before disposal, the liner will not interrupt the recycling process of the container.
- **INKS:** Use non-toxic, non-bleeding inks, in case of direct printing only lasermark indicating production or best before date.

HOW TO IMPROVE THE SUSTAINABILITY OF YOUR GLASS PACKAGING?

The environmental challenges impact all of us very seriously. While the use of packaging is necessary, it is possible to minimize the impact of packaging through smart optimisation of your packaging and production processes.

In a circular economy, packaging is traded in closed loops. It is important to retain the value of your products and materials after disposal. Therefore, it is not only important to consider what materials are used, but also to make sure that your products are fit for recycling and can be used again. This way, it allows materials to live a long life where value can be retained.

GLASS IS AN IDEAL MATERIAL FOR A CIRCULAR ECONOMY.

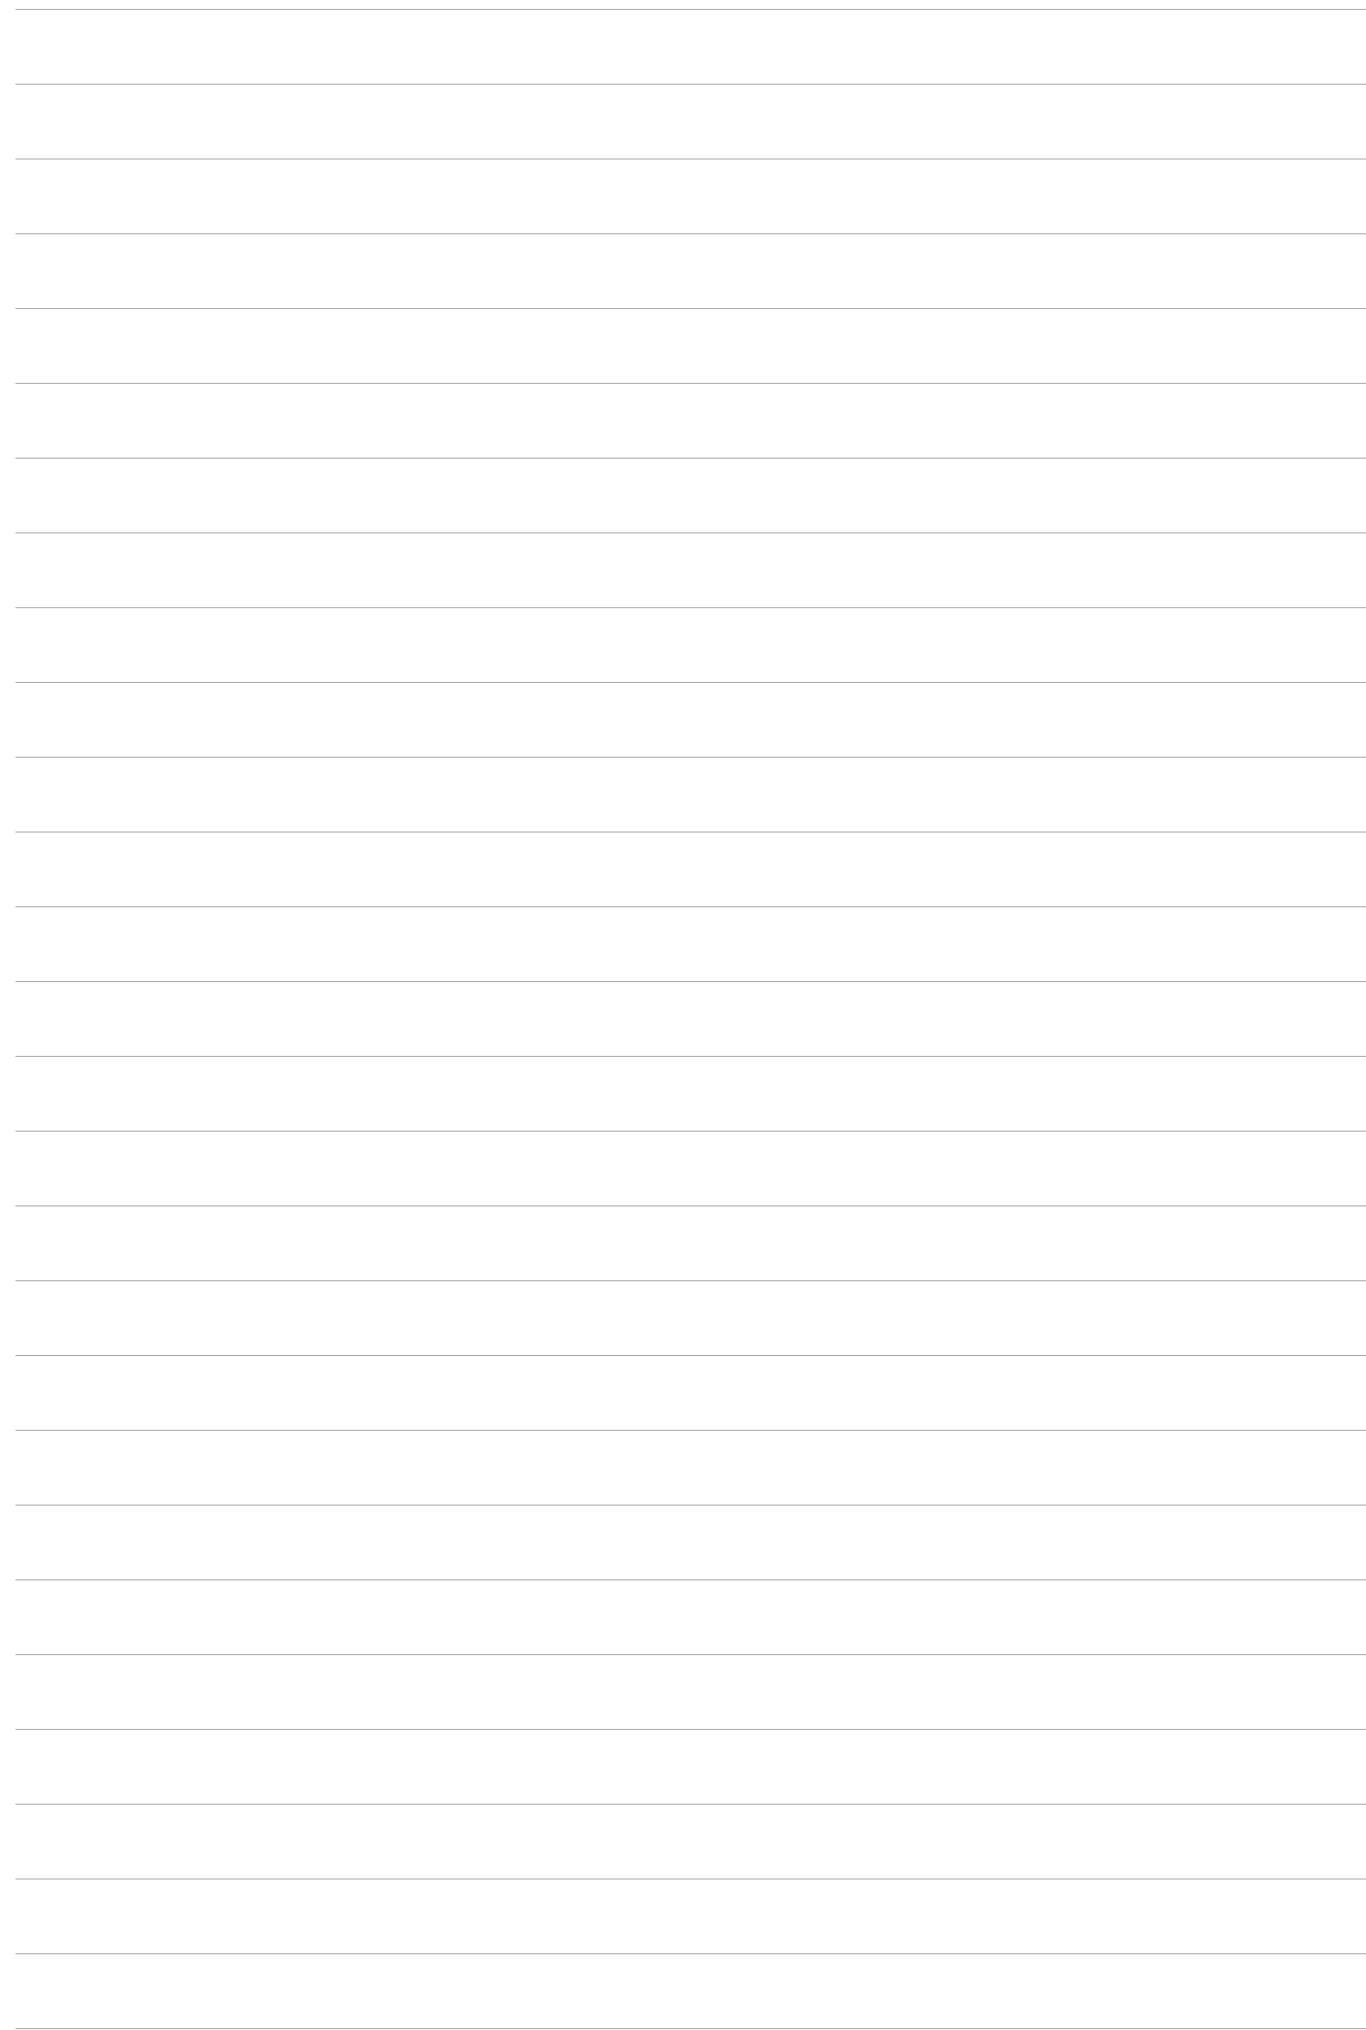

It is important to recycle glass, glass is 100% recyclable and can endlessly be remelted with no loss of quality. By recycling your glass packaging, non-renewable fossil fuel usage can be reduced as well as the emissions of process CO₂ from the carbonate raw materials such as limestone.

FOR GLASS PACKAGING

- **MATERIAL:** Choose items produced with recycled glass.
- **COLOUR:** Minimize colours; preferably keep the glass translucent, white, green, or brown, for which disposal streams are already in place. Avoid metallizing.
- **LINERS:** Avoid / minimize additional components such as liners.
- **LABEL:** Use paper labels or direct printing. Minimize the size of the label. Avoid full body sleeves, or plastic shrink film. Include information on correctly recycling of each component of the packaging.

- **SIZE:** Avoid using a container larger than needed to pack the product. Lightweight where possible.
- **CAP:** Ensure compatibility for recycling. Use steel, aluminium, PE or PP closures. Avoid composite materials. Caps should be easy detachable for separate recycling.
- **ADHESIVES:** Avoid the use of hot melt adhesives. Avoid glued on decorations.
- **INKS:** Please use non-toxic inks. Direct printing allows the glass to break down into cullet.

European packaging supplier PONT offers a wide range of containers and bottles in plastic (virgin, recycled or bio-based) and glass as well as associated closures and accessories.

With a network of well-stocked warehouses and sales offices strategically located throughout Europe, PONT quickly delivers efficient packaging solutions worldwide.

PONT focuses on packaging innovations and is renowned for creative and attractive designs that meet our customers' requirements.
